Freddy Hany Edward

Software Developer

Cairo, Egypt | +20 121 090 5008 | freddyhany99@gmail.com | linkedin.com/in/freddy-hany | github.com/freddy9910

PROFESSIONAL SUMMARY

Software developer with 3+ years of agency, in-house and freelance experience building production websites and web applications for clients across Egypt, the Gulf and the UK. Specialised in WordPress — custom themes, plugins and WooCommerce storefronts — alongside PHP, Laravel and MySQL development for custom systems such as booking platforms and clinic management tools. Comfortable owning delivery end to end, from design hand-off through API integration, deployment, performance tuning and ongoing support.

PROFESSIONAL EXPERIENCE

Software Developer — WebOps 02/2026 – Present · Cairo, Egypt

- Build and ship custom WordPress themes and plugins for client sites across the corporate, healthcare and e-commerce sectors.
- Develop Laravel/PHP back-end features, database schemas and REST API integrations with third-party services.
- Own releases end to end — staging, deployment to managed cloud hosting, post-launch maintenance and client support.
- Improve page-speed, Core Web Vitals, on-page SEO and cross-browser behaviour on both new builds and inherited codebases.

Back-End Developer — Ergasti Digital 10/2024 – 01/2026 · Cairo, Egypt

- Delivered production websites and web applications spanning hospitality, retail, healthcare and industrial clients.
- Built back-end services in Laravel and PHP with MySQL — relational schema design, Eloquent models, authentication and role-based access.
- Developed and documented REST APIs, and integrated payment, booking and third-party platform endpoints.
- Converted design hand-offs into responsive, cross-browser front-ends, and worked alongside designers and project managers through review cycles.

Web Developer & IT Support — TG Industrial 03/2024 – 09/2024 · Cairo, Egypt

- Designed, built and launched the company's corporate website (tg-industrial.com) as sole developer.
- Managed hosting, domains, business email and ongoing content updates.
- Provided day-to-day IT and help-desk support to staff across hardware, software and network issues.

Web Developer, Intern — Madaeen Al-Jazira for IT 11/2023 – 12/2023

- Built internal web modules using AngularJS, ASP.NET Core and SQL Server within an existing enterprise codebase.

Web Developer, Intern — 2B 05/2023 – 06/2023

- Developed responsive web pages and data-driven features with HTML, CSS, JavaScript, PHP and MySQL.

SELECTED PROJECTS

AT WEBOPS

Spark — Education platform for an Arabic-language youth programme — structured 48-lesson curriculum, course pages, member accounts and teacher/parent resource libraries. sparkyouthclub.com
